EXAMINER'S ACTION

Art Unit: 2832

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-23 and 27-39 are, drawn to an article, classified in class 336, subclass 55.
- II. Claims 24-26, drawn to a method, classified in class 29, subclass 602.1.

These inventions as grouped above are distinct each from the other for the reason that the article recited in the claims of Group I is not dependent upon the steps of the method of the claims of Group II but may be produced by at least one other method. For example, instead of forming the insulating layer by a solid insulating material, the insulating layer could be formed by a liquid which is later cured; see *In re Ference* 1934 C.D. 227; 68F(2) 737(C.C.P.A.).

Because these inventions are distinct for the reasons given above, have acquired a separate status in the art, and require different fields of search, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to T. Kozma whose telephone number is (703) 308-1326. The examiner can normally be reached on Monday-Friday from 6:30 AM to 4:00 PM.
